

New Launches

WIRELESS MICROPHONE SYSTEMS

XAWR01

- Single channel with latest UHF technology.
- Auto scan function can quickly search undisturbed channels. Each channel with bandwidth of 25 MHz.
- Upto 100m audio capture distance.
- Dual-tuned auto-selection eliminates dead spots in reception and avoids interruption.
- Carrier frequency using UHF band, the oscillation circuit using PLL design, which is stable in working, low in harmonic radiation.

- Dual channel with latest UHF technology.
- Auto scan function can quickly search undisturbed channels. Each channel with bandwidth of 25 MHz.
- Upto 100m audio capture distance.
- Dual-tuned auto-selection eliminates dead spots in reception and avoids interruption.
- Carrier frequency using UHF band, the oscillation circuit using PLL design, which is stable in working, low in harmonic radiation.
